Kalle Raatgever

KR

SOFTWARE ENGINEER

✆ +31 (6) 39410125 ✉ kalleraatgever@hotmail.nl

Software engineer with a strong track record in full-stack development, data engineering, and Agile delivery. Known for writing clean, maintainable code and actively mentoring junior colleagues to help teams grow. Thrives in collaborative, fast-moving environments where ownership and quality both matter. Looking to grow into a role with more technical leadership and broader architectural responsibility.

EXPERIENCE

Software Developer
09/2022 – Present

YUNGO

- **Mentors junior developers** through code reviews and pair programming, consistently raising the quality bar across the team.
- Takes ownership of features and projects from initial design through to production, coordinating with stakeholders at every stage.
- Drives Agile/Scrum ceremonies including sprint planning, stand-ups, retrospectives, and backlog refinement, keeping teams focused and delivery on track.
- Builds and maintains scalable web applications using **Django, React, and Node.js**, with a focus on clean architecture and long-term maintainability.
- Works with **REST APIs** and authentication integrations including **Microsoft MSAL**.
- Has experience setting up and managing **local development and production servers**, including deployment pipelines and server dashboards.
- Worked with **image recognition models** and built a **Chrome extension** as part of internal tooling.
- Regularly refactors back-end code and database structures to reduce technical debt and keep the codebase maintainable.

Data Engineer
07/2021 – 07/2022

ALLINQ

- Delivered tailored data solutions for clients, translating raw data into clear insights that supported better business decisions.
- Built interactive dashboards in **Power BI and Power Query**, making complex data accessible to non-technical stakeholders.
- Designed and maintained **ETL pipelines in Azure and Databricks**, improving data reliability and cutting processing time.

INTERNSHIPS

Smart Asset Management
09/2020 – 06/2021

ALLINQ

- Delivered a live infrastructure dashboard for **Schiphol Airport** using Python, SQL, and Power BI, giving operational teams real-time visibility.
- Built data models and analytics tooling that formed the foundation for the client's asset management strategy.

Assistant Scrum Master
09/2018 – 01/2019

ALLINQ LABS

- Facilitated Scrum ceremonies and coached the team on Agile best practices, helping build a culture of continuous improvement.
- Co-developed a **VR application for Android** using Unity and Leap Motion, gaining early hands-on experience in cross-platform development.

EDUCATION

BSc Software Engineering

HIGHLIGHTS

- Mentors junior developers and fosters team growth
- Agile/Scrum mindset, experienced in ceremonies and facilitation
- Takes full ownership of projects end-to-end
- Customer-focused; delivers exactly what the client needs
- Thoughtful and detail-oriented problem-solver
- Strong communication and listening skills

TECHNICAL SKILLS

PROGRAMMING
Python, JavaScript, TypeScript, SQL

FRAMEWORKS & LIBRARIES
Django, React, Node.js, REST APIs, Microsoft MSAL

AGILE & LEADERSHIP
Scrum, Mentoring, Code Review, Sprint Planning

DATA & BI
ETL, Power BI, Power Query, Azure, Databricks

INFRASTRUCTURE
Server setup, deployment pipelines, admin dashboards, Linux, Bash

TOOLING & WORKFLOW
Git, CI/CD, Azure DevOps, Chrome Extensions

OTHER
Image recognition integration, C4 models, UML, sequence diagrams
